

CRICFIT AI — PERFORMANCE REPORT

Activity: **BATTING** | Report ID: CF-DC0CC43A | Date: 07 Sep 2026, 04:57 PM

92/100
Overall Score (Low Risk)

1. ATHLETE PERFORMANCE & TECHNICAL SUMMARY

You executed a Pullshot (classified with 99.7% AI confidence). Your movement quality scored 95.8% compared to reference pro standards. Your upper-body bat swing shows solid intent, but there is noticeable trunk sway and knee flexion drift during the impact phase.

Identified Stroke: Pullshot (AI Confidence: 99.7%)

2. BIOMECHANICAL METRICS (0 – 100)

Biomechanical Metric	Score	Standard Benchmark	Status
Balance	95/100	75.0 / 100	Elite
Lower Body Stability	82/100	75.0 / 100	Good
Hip Mobility	69/100	75.0 / 100	Needs Work
Core Stability	95/100	75.0 / 100	Elite
Coordination	95/100	75.0 / 100	Elite
Body Symmetry	91/100	75.0 / 100	Elite
Movement Quality	95/100	75.0 / 100	Elite

3. TARGETED CRICKET FITNESS DRILLS & IMPROVEMENT MECHANICS

1. Split-Stance Isometric Lunges (3 sets × 45 seconds each leg) — Target: Quadriceps & Glute Medius Stability

How this fixes your technique: Strengthens the front-leg braking base, locking your head over the ball during drive execution.

2. Paloff Press with Resistance Band (3 sets × 12 reps per side) — Target: Anti-Rotational Core & Obliques

How this fixes your technique: Prevents torso over-rotation and helps you hold your shape through the entire batting stroke.

3. Medicine Ball Rotational Slams (4 sets × 8 reps per side (4-6 kg ball)) — Target: Kinetic Chain Power & Hip Drive

How this fixes your technique: Develops explosive hip-to-shoulder sequencing, generating bat speed without sacrificing balance.

Long-Term Performance Impact: Consistently following these exercises builds a rock-solid lower-body foundation and explosive rotational power. You will notice sharper timing, cleaner ball striking, and significantly reduced strain on your lower back and knees.

4. CRICKET NUTRITION & RECOVERY GUIDELINES

Pre-Training Energy:	Oatmeal with banana, chia seeds, and 1 boiled egg (or whey protein) 90 minutes before batting practice.
Post-Training Recovery:	Grilled chicken breast or paneer with quinoa/brown rice and mixed vegetables within 45 minutes of training.
Hydration Strategy:	Drink 500ml water with electrolytes before training; sip 150ml every 15-20 minutes in the nets.
Key Power Foods:	• Bananas & Dates for quick, sustained complex energy • Eggs / Paneer / Greek Yogurt for muscle tissue repair • Beetroot juice to enhance oxygen flow and muscular stamina
